
Core Facility | Augsburg

Tissue Microarray

Instrumentation:

Tissue microarrays are a highly valuable tool for paraffin embedded tissue based scientific projects. A fully automated system is available that is connected to high resolution scanner enabling highly precise and fast TMA constructions.

Systemex TMA Grandmaster and Systemex Panoramic Scan II

Services:

- TMA construction with different core sizes
- TMA-slide scanning including fluorescence staining

Contact Information:

Facility Location: UK Augsburg
Stenglinstrasse 2
86156 Augsburg
