

## Brillenschnittführung

## osteoplastischer Zugang

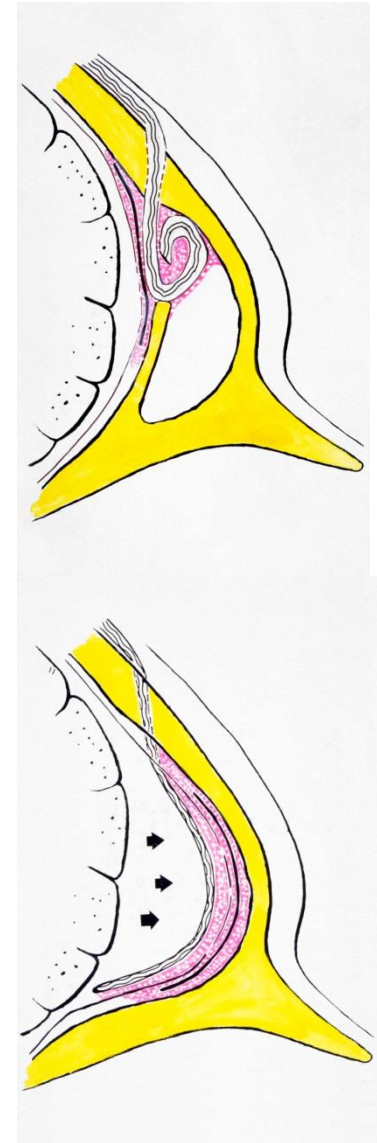

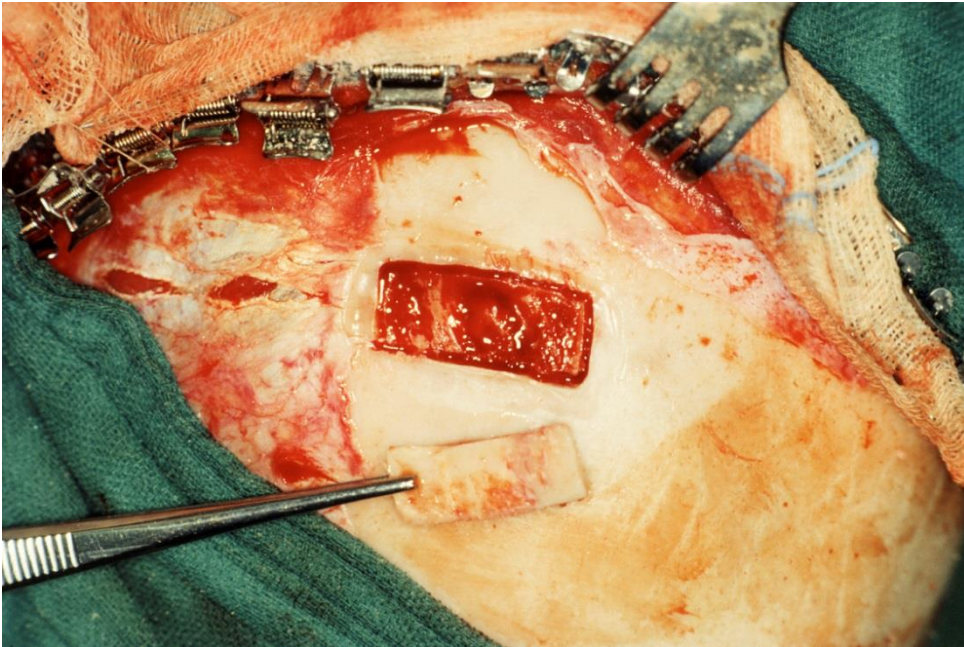

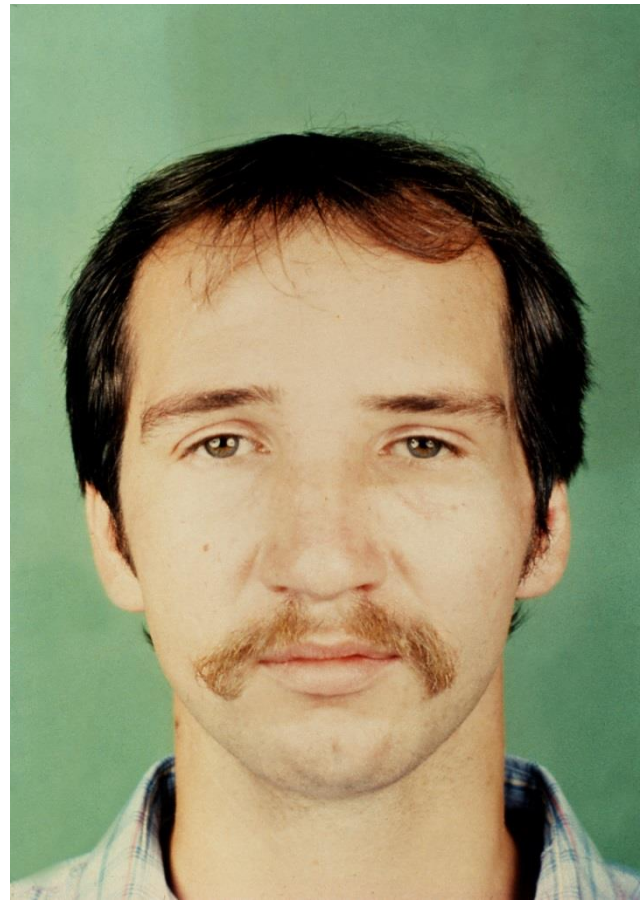

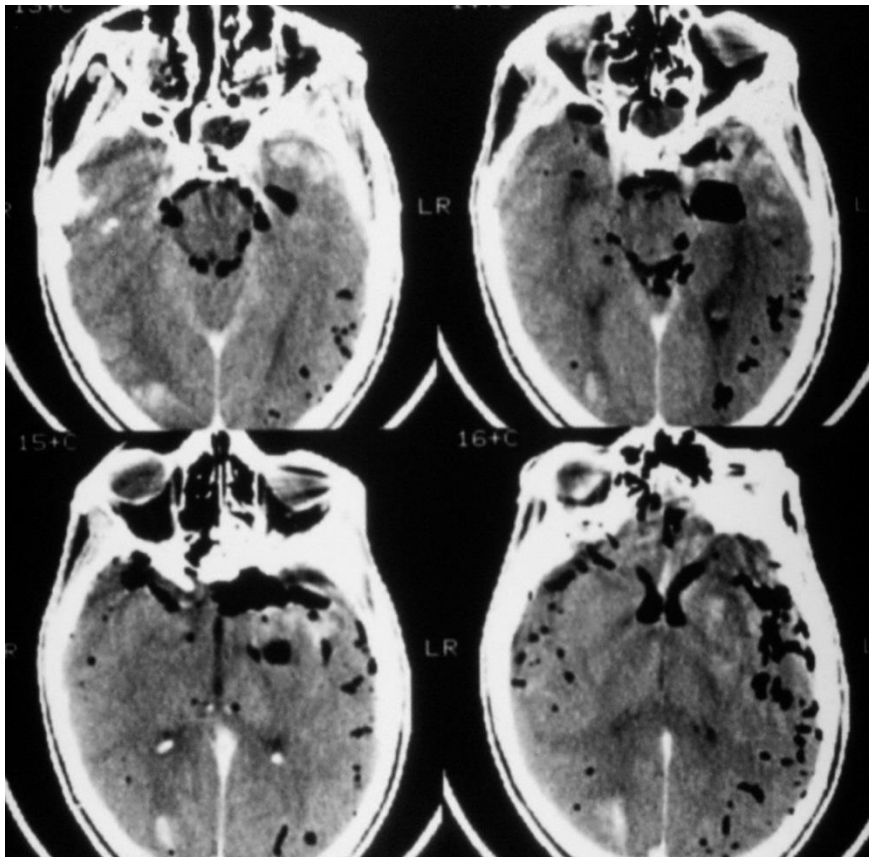

Duraplastik mit konservierter  
Fascia lata und Fibrinkleber

# Bügelchnittführung n. Unterberger

- Galeaperiostlappen
- Knochenspanentnahme
- komplette oder partielle Stirnhöhlenobliteration

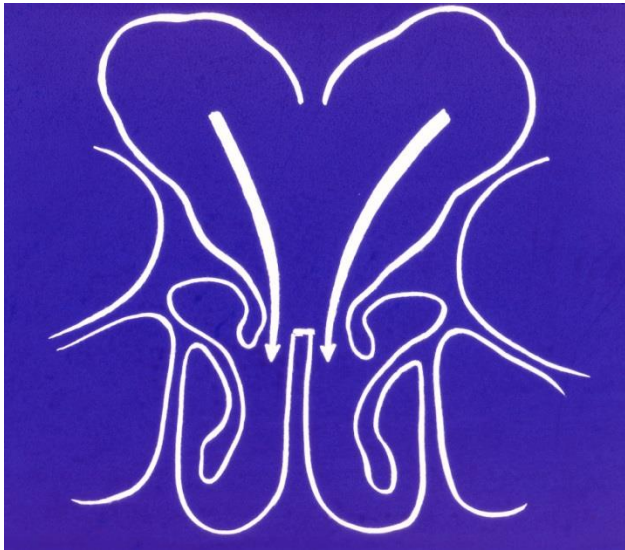

Entzündliche Frühkomplikationen

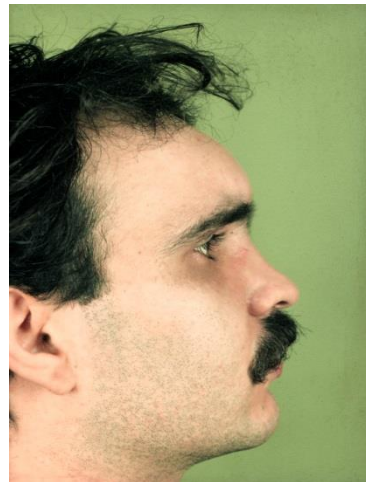

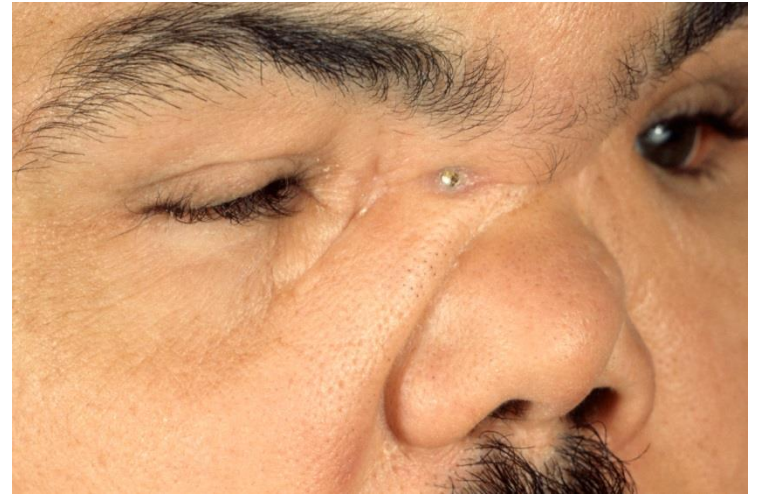

häufig bedingt durch insuffiziente Stirnhöhrendrainage

Mediandrainage n. O. Mayer

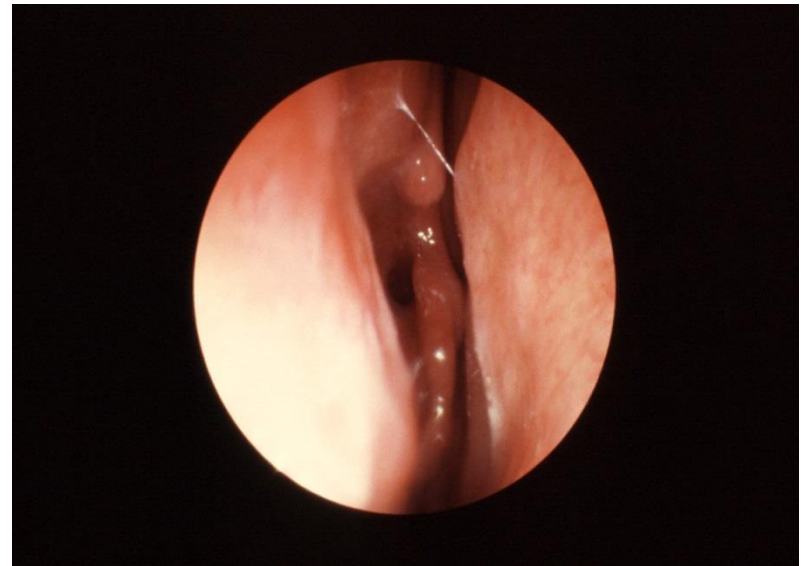

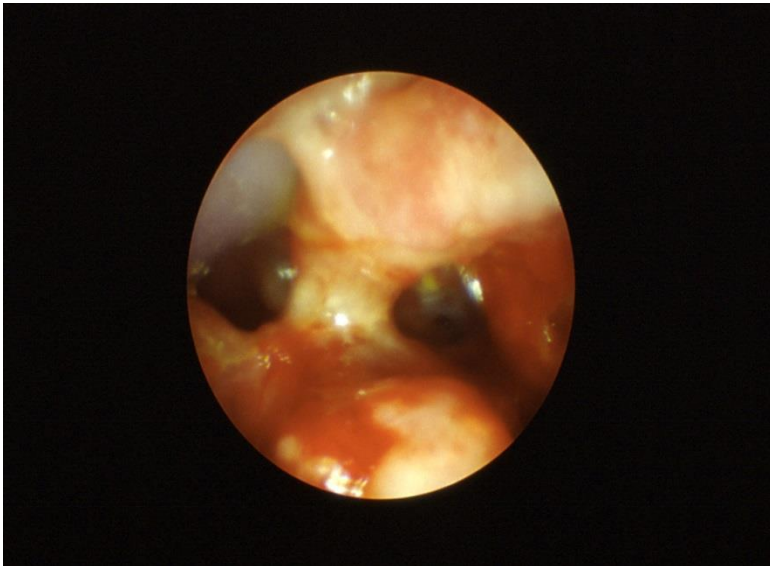

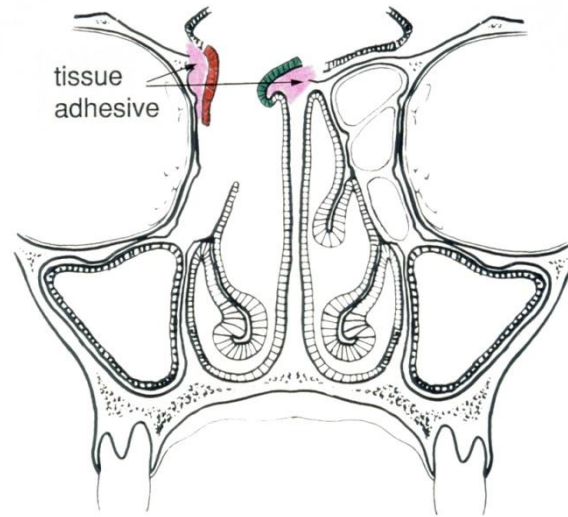

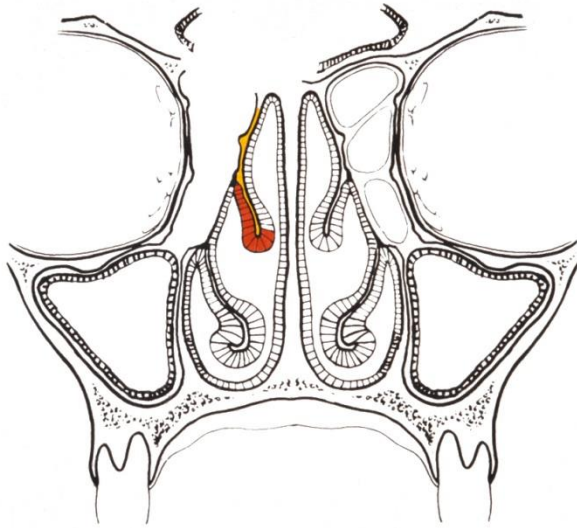

Komplikation

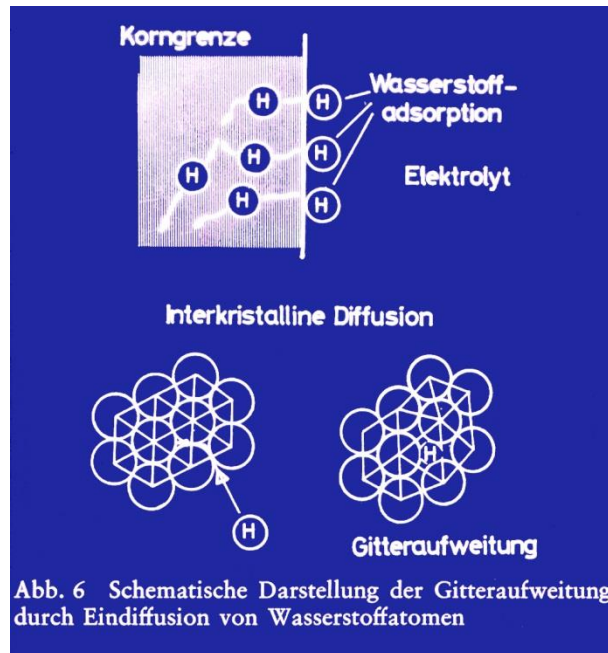

Dislokation des Osteosynthesematerials

# Stirnhöhle drainage n. Brunner

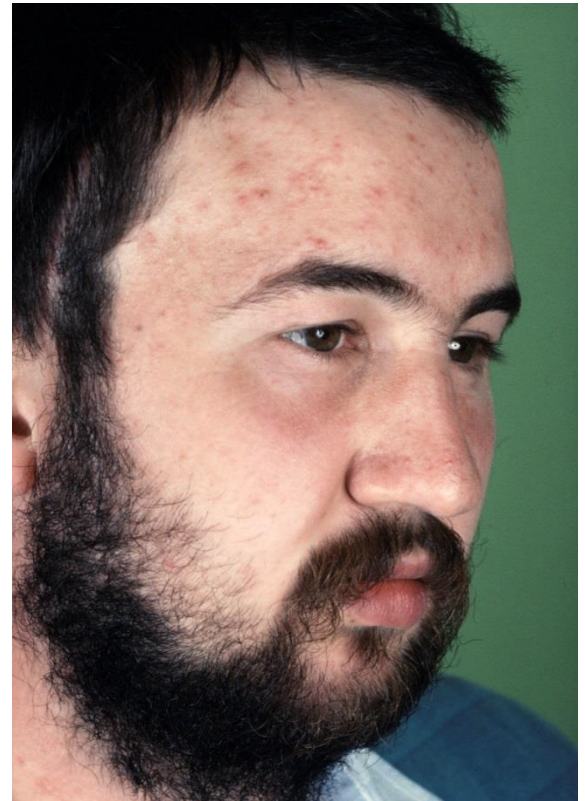

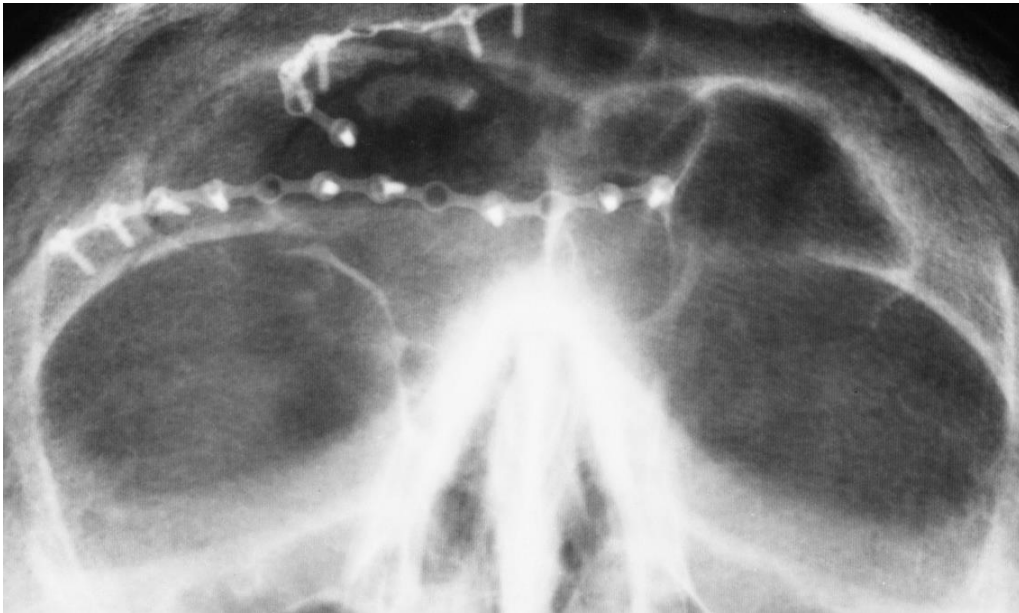

# Allergische Reaktion bedingt durch Osteosynthesematerial aus Chrom-Kobalt-Stahllegierung (Champy-Platten)

## Allergische Reaktion auf Titanabrieb

Histologie (HE)

Riesenzell- und  
Mikrogranulombildung durch  
Titanabrieb am  
Schraubenkopf
